

H4 Plus

WiFi/Cellular Smart Home System

Smart & Secure Home

With WiFi & Cellular dual protection, H4 Plus is an ideal choice for home security. When doors/windows are opened or when motion is detected, it sounds a loud siren on site to deter would-be intruders and sends SMS, email notifications and makes calls to the pre-authorized phone numbers.

CHUANGO®

H4 Plus

WiFi/Cellular Smart Home System

• Account Management and Sharing Function

Account management enables users to add more than one device and share devices to other accounts (up to 5 accounts)

• Door/Window Unclosed Alert

When you arm or home arm the system, if any door or window is left open, it will remind you via app push and text message.

• Grow with You & Grow on You

H4 Plus is an expandable system, which can work with a wide range of wireless, battery-powered sensors and accessories that are easy to install and use, so you can scale up the system based on your specific security needs. You can add up to 50 sensors/accessories.

• 3rd Party Integration

The H4 Plus can be voice controlled through Google® Assistant and Amazon® Alexa. It can also interact with Philips® Hue lights, and control Nest® thermostat on H4 Plus free app, which you could download from either App Store or Google Play.
