

## Thronmax Proof-Pop Filter P1

Made for Broadcasters And Gamers.

- Advanced Pop Filter - P1 is a professional advanced pop filter for vocal applications.
- Dual-layer Steel and Nylon Mesh – P1 is made from carbon metal and nylon material that eliminates pops far more effectively than fabric filters and can be used for a long time because of stainless steel material, which prevent spattering saliva from rusting
- Curved Shield Design - Curved shield design ensures dry and clean vocal and voiceover tracks while attenuating external noise and reducing excessive plosives
- The Most Acoustically Transparent Windscreen -- Based on the test of different microphone equipment, the vocal tracks show clearly that the P1 achieves incredibly clear vocal tracks by providing exceptional muting of plosives while tracking vocals, instead of letting part of vocals attenuates with the decrease of excessive plosives
- Easy to Assemble - The pop shield is a universal windscreen for use with any microphone. Simply clamp it to the mic stand and position where desired.
