# Dual Wireless Charging Pad - 30 W

Model# 102209

## Dual Wireless Charging Pad - 30 W – Simple, Fast Phone Charging

Charging your phone is even simpler with the Manhattan Dual Wireless Charging Pad - 30 W. As your list of wireless-charging devices grows, you need a quick, safe way to charge them. Whether it's a smartphone with built-in wireless charging, a phone case that supports it, your wireless earbuds or other devices, this versatile Dual Wireless Charging Pad makes it easy to get power back into your device fast. With a dedicated charging pad, there's no need to find the right cable or worry about slower charging from a low-amp wall charger every time your phone needs power. This Dual Wireless Charging Pad includes a 30 W Power Delivery Wall Charger to ensure a consistent charge every time. Plus, the charger will power other devices, so you can use it to charge your laptop, tablet or handheld gaming console.

Once you set your device on the charger, it gets the fastest, safest charge – from 15 W, 10 W, 7.5 W or 5 W. As long as it isn't made of metal and is less than 3 mm (0.12 in.) thick, your phone case won't interfere with charging, so your phone stays protected. The Manhattan Dual Wireless Charging Pad - 30 W truly offers a no-hassle way to charge up your phone fast.
