

Smart Bracelet FontaFit 460CH „TILA“

With Smart Bracelet FontaFit 460CH Tila with metal housing and touch-sensitive real glass display you always have an eye on your activities! Besides the standard functions like time and date, step-counting, distance measurement and calorie consumption this watch also collects your heart rate and measures your blood pressure as well as sleep duration, sleep activities and sleep cycle. For sport activities, several modes can be used.

The Smart Bracelet provides alarm/wake function and on request gives a reminder for regular exercises. Also, the FontaFit 460CH Tila displays incoming calls and messages or push notifications on its color display. You can use the Bracelet to control the music and camera on your smartphone. Activity data and sleep mode are stored even without a paired smartphone.

The FontaFit 460CH is waterproof and with the durable silicone strap it is perfect for sports activities.

For the FontaFit Fitness watches we provide a free user-friendly App for Android and IOS which evaluates the data on your smartphone and clearly displays these for your information.
