

Hi-Speed USB 2.0 Audio/Video Grabber

Model
164115

Easily capture and convert audio/visual content into digital media.

The MANHATTAN® Hi-Speed USB 2.0 Audio/Visual Grabber connects a media source to a desktop or notebook computer to capture, convert and edit content. Ideal for sharing favorite video clips or "snapshots" through email or on the Web, it records and processes data from a camcorder, VCR, TV or other media device equipped with S-video or RCA outputs. A single-button control with LED indicators activates a built-in chip that encodes directly in MPEG 1/2/4 format.

Get Professional Results with Little Technical Effort

Included is a full-version of Ulead VideoStudio 9 SE software with advanced capture, editing, preview and creative options to help computer-video enthusiasts easily produce professional-quality videos. Its Movie Wizard and Editor modules can easily add sophisticated transitions, chroma key ("blue screen"), filters, Flash animation, voice narration, background music and other special effects.

Easy to Install and Use

Simple USB connection and Plug and Play capability, Windows compatibility and USB connection combine to make installation quick and simple. Bus power requires no batteries or external supplies for convenient use almost anywhere.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
164115

Features

- Easily capture media from camcorder, VCR, TV or other A/V source and transfer to computer
- Edit, convert and share content through email, on the Web or on DVDs
