Thank you for purchasing the INTELLINET NETWORK SOLUTIONS™ Gigabit Ethernet Desktop Switch, Model 530347 (8-port) or 530378 (5-port).

Perfect for the home or small office, this device's Gigabit Ethernet ports provide the high performance your network needs for handling the quick transfer speeds that support disk mirroring, data backup, graphics image file transfers and other bandwidth-intensive applications.

Auto features make it easy to use, too. No configuration is required, making installation Plug and Play and hassle free. Auto-MDI/MDI-X on all ports eliminates the need for crossover cables, and each port senses the link speed of any connected network device automatically, adjusting to 10, 100 or 1000 Mbps for compatibility and maximum performance.

Simple setup means you'll also soon be enjoying the benefits of these additional features:

- Full flow control support provides optimum performance
- Auto-learning of network configuration
- High performance, half and full duplex, with zero packet loss
- Rugged metal housing for maximum durability
- Supports jumbo frames up to 9.6 kBytes
- Supports up to 8,192 MAC address entries
- 144 kBytes buffer memory
- Lifetime Warranty
