

## Gigabit PCI Network Card

32-bit 10/100/1000 Mbps Ethernet LAN PCI Card

Part No.: **522328**

The Intellinet Gigabit PCI Network Card, 522328, is a high-performance network adapter designed to fit into the PCI slot of your desktop computer. It allows you to upgrade your computer to support Gigabit network speeds without changing your copper network cabling scheme to fiber optic.

### Faster Throughput

The Gigabit PCI Network Card supports throughput rates of up to 2 Gbps when running in full duplex mode. This is ideal for resource-intensive CAD/CAM, client-server database, multimedia, pre-press, advertising graphics, and server and mission-critical applications.

### Auto-Negotiation

The Gigabit PCI Network Card will automatically detect the network speed that the LAN switch port is set to and run at the same speed. The card supports 10Base-T Ethernet, 100Base-TX Fast Ethernet and 1000Base-T Gigabit Ethernet.

### Full Duplex

When running in full duplex mode, the Gigabit PCI Network Card provides the following throughput rates: 20 Mbps (10Base-T Ethernet), 200 Mbps (100Base-TX Fast Ethernet) and 2 Gbps (1000Base-T Gigabit Ethernet).

### Built-in Diagnostics

The Gigabit PCI Network Card comes standard with crossover detection and auto-correction capabilities that make installation and maintenance a snap.

### Remote Power On

The Wake-On-LAN feature allows you to power on your desktop PC from anywhere on the network.
